O R D E R

IT IS ORDERED that East Kentucky Power Cooperative, Inc. ("EKPC") shall file the original and six copies of the following information with the Commission with a copy to all parties of record within 20 days from the date of this Order. If the information cannot be provided by this date, EKPC should submit a motion for an extension of time stating the reason a delay is necessary and include a date by which it will be furnished. Such motion will be considered by the Commission.

At the hearing on December 6, 1991, EKPC stated that the West Frankfort-Shelby County transmission line (Alt 2) would basically follow I-64 from Frankfort to Shelbyville. However, the map provided by EKPC shows that Kentucky Utilities Company ("KU") has an existing 69KV transmission line between West Frankfort and Shelbyville that serves EKPC's load in the Shelbyville area.

1. Provide a map showing the route of Alt 2 and every structure within 200 feet of the transmission line. Also identify by use each structure shown.

a. Provide an estimate of the total cost associated with Alt 2 and explain how the estimate was derived.

b. Provide the number of parcels of property over which the transmission line would pass.

2. Explain in detail whether EKPC can construct a 138KV line on KU's existing right-of-way between Frankfort and Shelbyville. Include in your explanation a description of any modifications that would be needed on KU's system to accommodate the addition of a 138KV line.
